Non-Woven Products

Disposable Products

Non-Woven Fabric

Non-woven fabrics are neither knitted nor woven. They are made by assembly of fibres bonded together by mechanical, chemical or thermal methods. Non-woven fabrics can be used to make single-use or more durable longer-lasting apparel. Non-woven fabric is more economical and hygienic than knitted or woven fabric.

Properties of Non-woven fabric

- Soft
- Colorfast
- Flexible
- Recyclable
- Light-weight
- Excellent resistance to moisture
- Provides good insulation
- Good resistance to a variety of oils and solvents
- Does not deteriorate in presence of bacteria or mold

Because of their versatile nature, non-woven fabrics are used in a variety of industries across diverse applications.

Polypropylene

Spun-bonded polypropylene provides protection against dry particulates and light liquid splashes. Polypropylene provides superior breathability and is soft and lightweight; products from non-woven polypropylene are very comfortable for long-term wear.

Microporous

Microporous material traps dirt, bacteria, spore and other airborne contaminants while allowing gasses to pass through, making it a very breathable material. The material is flexible and light in weight, yet provides strength and durability.

- Dry particles
- Air molecules
- Moisture

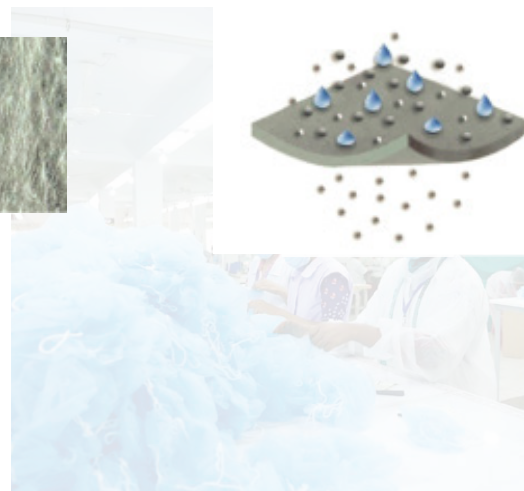

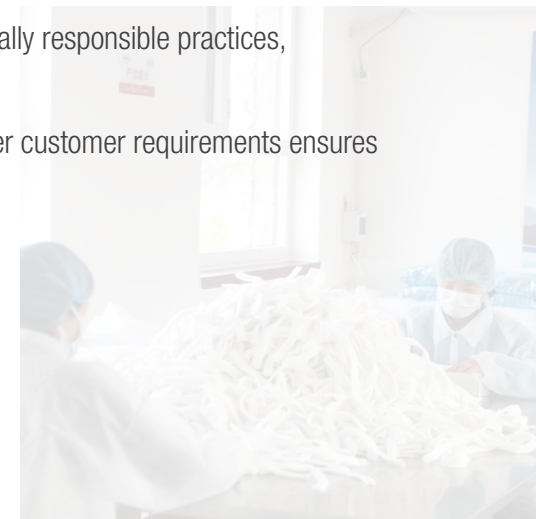

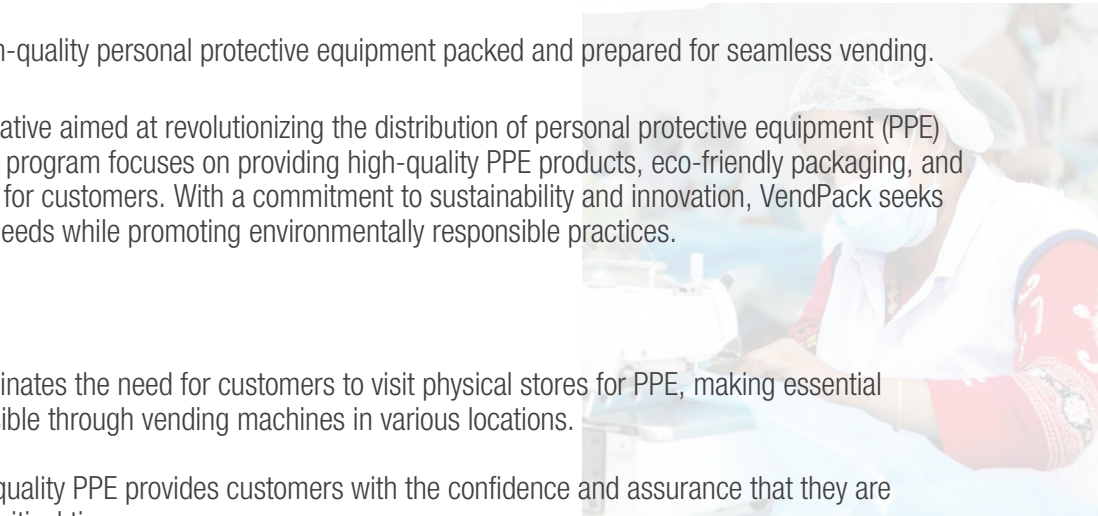

VendPack offers a range of high-quality personal protective equipment packed and prepared for seamless vending.

VendPack is a cutting-edge initiative aimed at revolutionizing the distribution of personal protective equipment (PPE) through vending machines. Our program focuses on providing high-quality PPE products, eco-friendly packaging, and a seamless vending experience for customers. With a commitment to sustainability and innovation, VendPack seeks to meet and exceed customer needs while promoting environmentally responsible practices.

Benefits:

1. Convenience: VendPack eliminates the need for customers to visit physical stores for PPE, making essential protective gear readily accessible through vending machines in various locations.
2. Safety Assurance: Our high-quality PPE provides customers with the confidence and assurance that they are adequately protected during critical times.
3. Sustainability: By opting for eco-friendly packaging and promoting environmentally responsible practices, VendPack contributes to a cleaner and greener planet.
4. Customizability: VendPack's willingness to optimize and develop products as per customer requirements ensures that clients receive personalized solutions that best suit their needs.

Pleated Mask
N 95 Mask
And more

Pleated Mask

Pleated Mask, Level 1, 2 & 3

The pleated masks are 3 ply pleated masks and are commonly used as procedure masks in healthcare settings and in general cleaning / sanitation and food applications. The soft material is fluid resistant and provides a barrier against dust and fine particles. The masks come with ultra-sonic welded latex-free ear loop design for good fit. A nose pin provides adjustment for all facial contours.

5633 ASTM Level-3

- 3-ply pleated masks meet ASTM F2100 standard for Level-3 protection and provide the highest level of splash resistance in accordance with ASTM F 1862
- Made of soft inner layer (spunbond polypropylene material) for maximum user comfort in terms of breathability and long-term wear
- Superior quality melt blown filter layer provides high bacterial & particulate filtration efficiency that exceeds the requirements of ASTM standards
- Hydrophobic outer layer (spunbond polypropylene material) provides protection when at risk of encountering blood and/or bodily fluid splatter

5622 ASTM Level-2

- 3 ply pleated masks meet and exceed the ASTM F2100 Standards for Level-2 protection in terms of breathability and long-term wear
- Made of soft inner layer (spunbond polypropylene material) for maximum user comfort
- Superior quality melt blown filter layer provides high bacterial & particulate filtration efficiency that exceeds the requirements of ASTM standards

5616 ASTM Level-1

- Excellent Breathability and high comfort
- Good Bacterial and Particulate Filtration Efficiency
- Prevents respiratory droplet from spreading
- 3 ply pleated masks meet and exceed the ASTM F2100 level-1 standards

Pleated Mask	Blue
ASTM Level 1	5616
ASTM Level 2	5622
ASTM Level 3	5633

5622 & 5633: 10 masks packaged in a plastic sleeve x 5 sleeves = 50 masks per box; 20 boxes per case = 1,000 masks per case
5616: 50 masks x 20 boxes = 1000 masks per case

Dust Mask

Dust Mask

Dust masks are designed to provide comfortable, reliable protection in lightweight industrial, janitorial or painting applications against the inhalation of dust particles, cleaner or light chemical fumes.

- Latex-free elastic straps
- Adjustable nose bridge for comfortable fit

Dust Mask	White
Pro-Tec	5611

50 Masks x 20 Dispensers = 1000 Masks per Case

Coverall

Type 5/6 Coverall, With Hood

63 gsm MP

CoverMe XP Coveralls provide best in class protection against infective agents, blood, blood borne-pathogens, liquid aerosols, contaminated solid particles and chemical liquid spray. These are ideal for use in automotive, cleanroom, painting, industrial cleaning and chemical handling processes.

- Category III, Type 5/6 Certified Coverall
- Fully elastic wrists, waist and ankles for the best fit
- Suitable for Cleanroom application – ISO Class 6 & above
- Infective agents – EN368, EN14126:2003 and ASTM F1670 compliant

N95 Respirators

Particulate Filtering Respirator, (Flat / Vertical Folded)

- The lightweight respirator helps provide quality, reliable, and convenient worker respiratory protection against bodily fluids and blood.
- Individual automated packaging helps protect the respirator from contamination before use.
- Conforms to eye and nose contours of the face ensuring more room for eyewear and compatible with a variety of eyewear.
- Embossed top panel and adjustable nose clip with soft and comfortable fog-reducing foam facilitate in reduction of eyewear fogging.
- High-quality nose clip ensures proper fit to all facial contours.
- Head straps are 100% latex-free to minimize risks of allergic reactions.

Medical N95:

The medical respirators offer:

- Successfully tested with Class-1 flammability rating.
- Superior performance in protection against splashes of bodily fluids and blood.
- Superior, reliable, and convenient respiratory protection in healthcare workplaces.
- Successfully tested for biocompatibility, including cytotoxicity, skin irritation, and skin sensitization.
- Offered in two different styles: Vertically folded with two panels and flat-folded in three panels to meet the needs of different wearers.

Microporous Shoe Covers	Large	X-Large
CoverMe Shoe Covers	1992L	1992XL

100 Shoe Covers x 3 Dispensers = 300 Shoe Covers per Case

The microporous shoe covers are coated with a non-skid microporous film that provides excellent resistance to tears and moisture for excellent safety and hygiene in food, healthcare, pharmaceutical or other light industrial applications. They provide a barrier against fine dust and dry particles and are also fluid resistant.

Boot Covers

COVERME™
XP1000
Microporous Boot Covers
 50 gsm MP

CoverMe XP1000 boot covers provide adequate protection from non-hazardous dry particles and liquids while making sure that the user is comfortable. The XP1000 fabric is low-linting and inherently skid resistant making it the ideal choice for multiple end user segments.

- Protection from dry particles
- Great for use in hot & humid conditions
- Provides adequate protection from liquids
- Elastic opening for easy donning and doffing
- Low-linting fabric that reduces contamination
